MANAGEMENT DISCUSSION & ANALYSIS REPORT

Vipul Limited, a synonym for BUILDING HAPPINESS, is constantly spreading happiness over the years through its landmark developments. Its state-of-the-art technology and know-how is all set to bring a paradigm shift in the real estate industry.

With its commitment towards utmost customer's satisfaction, Vipul has been able to deliver the projects within the targeted timeline and shall make all efforts to keep the same in future as well.

INDUSTRY STRUCTURE AND DEVELOPMENTS

The Indian real estate sector plays a significant role in the country's economy. The real estate sector is second only to agriculture in terms of employment generation and contributes heavily towards the gross domestic product (GDP). The real estate sector is responsible for the development of over 250 industries such as cement, steel, paints etc. Though the real estate sector has managed to come out of the economic meltdown and has witnessed positive sentiments amongst buyers, the demand as expected is yet to be achieved. The economy continues to be volatile and inflationary and the consistent high rate of inflation has impacted the bottomline of realty companies at large. Moreover, the negative economic sentiments have further dampened overall consumer's sentiments.

OPPORTUNITIES AND THREATS

The Company foresees that the real estate industry will be headed by the actual users mainly in the Tier II, III, & IV cities. The long term view on the Indian Real Estate Industry is positive, as fundamental demand drivers such as increasing urbanization, favorable demographics, growth of the services sector and rising income levels. The Real Estate Sector in India has assumed growing importance with the globalization of the Economy. Development in the real estate sector as a whole are being driven by demand for:

- More housing units in cities and towns because of growing urbanization, burgeoning middle class, and increased dispensable income, easy availability of housing finance and tax incentives;
- Demand for commercial premises by growing retail segment.
- Demand for office space by growing services sector.
- Better infrastructure with the growing Indian economy through all its sectors;

Real Estate business of the company is dependent on the performance of the real estate market in India. Fluctuations in market conditions may affect capacity of the Company to sell projects at the expected prices, which could have unfavorable affect on our revenues and earnings. Inaccurate project estimates or delay in making project estimates (w.r.t. cost, time & selling price) may impact the profitability of Company's projects. Further, high customer outstanding or defaults in payment by customers may adversely affect the working capital cycle of the Company.

VIPUL has firm belief that the proven track record and the reputation associated with transparency will enable it to capitalize on upcoming opportunities in the competitive market.

SEGMENT-WISE OR PRODUCT-WISE PERFORMANCE

Like the previous years, Real Estate remained the main stream of business of the Company. The Company's primary policy to focus on Low and Mid Housing segment has proved to be effective step for the commendable growth. The Company also develops High- end luxury apartments & Premium Villas.

OUTLOOK

In view of the competitiveness amongst the developers, the company which honours its commitments made to customers will only be able to survive and sustain its position in long run. The Company's is firm on its policies and this shall be reason for the sustained growth in the periods to come.

It will be highly detrimental for any company to diversify to any other Sector in the recovering economy, the Company will continue to cater to the real estate sector in its present form.

RISKS AND CONCERNS

A big risk which the developers are facing is price fluctuation in the basic raw material like cement and steel. Real estate price cycles have the maximum impact on the margins of the developers, because land costs account for a large portion of the constructed property. The other risk to which the developers are exposed is demand risk which indicates the ability to sell properties based on location, brand, track record, quality and timelines of completion. Most real estate developers try to address this risk by undertaking market surveys in order to assess the demand for their properties. Sustained availability of housing loans at a cheaper rate is one of the reasons for growth in demand for housing units. There is Finance Risk also. Low availability of funds coupled with high rate of interest is also a major risk for real estate industry. Uncertain interest rates lead to uncertainty in the real estate market. This trend of rising interest rate may dampen the growth rate of demand for housing units. Change in Government Policies including change in Tax structure will also affect the Progress of the Real Estate Industry. The Indian Real estate market is still in its infancy, largely unorganized and dominated by a large number of small players, with very few corporates or large players having national presence. The Real Estate Industry is still subject to a number of taxes and is considered as one of the over burdened tax segment and the non-availability of low cost long term funds, for the real Estate/Construction Sector. However, the said risks can be averted if the Government directs its policies in Real Estate Sector towards regulatory framework instead of being restrictive in nature. Although major initiatives in the infrastructure of road and transportation have been made, yet the availability of Power still needs the attention of policy makers. The lack of uniformity in the regulatory environment concerning the real estate, as also the availability of quality manpower, and reliable databases on industry, are concerns that need to be addressed for attracting FDI inflows in the industry.

In the era of rising inflation day by day, the sharp increase in interest rates for housing loan has adversely affected the real estate sector by decreasing the ability of buyers to pay and purchase, thereby impacting the demand. The silver line in the cloud is that the economic growth and the increased income of end users have amicably countered the impact of higher interest rates.

As every other business, your Company also has significant exposure to different types and levels of risk. However, the Company has a well structured risk assessment and minimization mechanism, which is periodically reviewed by the Board of Directors. With thorough market understanding, strong marketing network, diverse and flexible expertise in different business aspects, your company has been able to manage and withstand risks and concerns faced by the industry.

2. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the result of operations during the reporting period. Although these estimates are based upon past experience, present realization and future presumptions, actual results may differ from these estimates. Any revision to these-accounting estimates is recognized prospectively.

3. Revenue Recognition

Revenue is recognized as follows:

- I. Revenue on construction/development of projects is recognized according to percentage of completion method after making appropriate allowance for foreseeable loss, if any. Estimated project cost includes cost of land/ development

rights, borrowing costs, overheads, estimated construction and development cost of such properties. However, when the total project cost is estimated to exceed total revenues from the project, loss is recognized immediately.
